

4 October 1974

NOTE FOR: Director of Training

Rod:

STAT  
1. I am in receipt of your memorandum of 25 September 1974, "Enrollments in Information Science Courses." Your memorandum plus its attachment from Mr. [redacted] of CIA clearly indicates the potential rise in non-CIA students in Information Science courses.

2. As you know, difficulties have presented themselves in implementing an understanding with DIA on the conduct of operational training at [redacted]. Until we get this matter ironed out and have a more clear picture as to whether DIA can furnish personnel ceiling to assist in training at [redacted] I suggest caution in committing ourselves to a higher enrollment in Info Science courses. We simply cannot afford, as I see it, to continue these inter-agency courses without a personnel contribution from DIA. We will know more about how this is working out shortly, but I think it is time to start to flash the yellow caution light.

/s/ John F. Blake
